### Applications include:

Cold Stores, Engineering, Automotive, Warehousing, Manufacturing, Outdoor Construction, Metal Handling, Utilities

### Limitations of Use

|                    |  |
|--------------------|--|
| <b>Maintenance</b> | Examine gloves for damages, splits and holes before each use. Always replace damaged gloves. Only properly fitting gloves guarantee protection and grip.           |
| <b>Storage</b>     | Store at normal room temperature in a dry, well ventilated area. Avoid direct heat radiation.  |
| <b>Disposal</b>    | Used gloves can be contaminated. Dispose with household waste or as instructed by your local authority.  |
| <b>Cleaning</b>    | Do not wash. The performance of the product after laundering is unknown. Beat or brush out after each use, depending on level of dirt.                             |
| <b>Durability</b>  | The period of use depends on the degree or intensity of use in the retrospective application. It is therefore not possible to provide a 'life span' of the gloves. |
| <b>Note</b>        | Due to the nature of this product the user is advised to carry out their own risk assessment before use, depending on application.                                 |
| <b>Warning</b>     | This product contains natural rubber latex which could cause anaphylactic responses.   |
